

26 June 2020

Dear Parents and students,

### **Principal's Message**

Hello everyone! With the development of the coronavirus disease (COVID-19) pandemic, the Education Bureau has repeatedly delayed the resumption of classes in all schools in Hong Kong. After a long wait, the school finally resumed classes on 15 June! On the first day of class resumption, standing in front of the school to greet our students, I was really grateful to see all the familiar and friendly faces. They returned to our "Pui Oi family" happily and healthily to continue their studies.

Since the Lunar New Year holiday, I haven't seen our students for more than five months. During this period, the school had regular communication with the parents. We have learned that the students are all well. With information technology, they learned at home and completed the tasks designed by the teachers and therapists. I sincerely thank all parents for their cooperation and support during these tough times. During the class suspension period, the children stayed at home. In addition to taking care of their daily lives, our parents also assisted their children in home study and home training. Parents, you have worked tirelessly in helping our students! It has been nearly two weeks after class resumption. I believe that our students have adapted to the school life. Here, I would like to urge our parents to continue to pay attention to the emotions and learning situation of our students and maintain close contact with the school.

Students, this school suspension period is not just a trial, but also a valuable experience, from which we have learned many lessons in life. We have learned the importance of personal hygiene, cultivating healthy and good habits. It also lets us understand that happiness in life should not be taken for granted. We need to cherish the blessings we have. We need to be grateful as well.

Although the pandemic situation has begun to ease, we will not slacken our efforts in the prevention work. Looking ahead, we hope that parents and our school will continue to work close together to cope with this pandemic and create a safe and caring learning environment for our students and let them grow up healthily and happily. We wish you all good health and happiness!

Yours sincerely,

Mr. WAN Chun Ki  
Principal
